PROFILE

Information Systems Engineer (degree pending) with experience as a development lead and full stack developer. I've designed modular multi-tenant architectures and built REST APIs with C#/.NET, as well as responsive interfaces with React, Angular and TypeScript, guided by UI/UX prototypes in Figma. I have experience with CI/CD and deployment with Docker on Linux servers.

EDUCATION

Universidad de Sonora Hermosillo, Sonora
Information Systems Engineering (degree pending) *August 2021 – October 2026*

- Outstanding Performance Certificate, CENEVAL EGEL (national undergraduate exit exam) in Software Engineering, 2026

EXPERIENCE

Hook Technologies Solutions Hermosillo, Sonora
Development Lead and Full Stack Developer (Internship) *July 2026 – October 2026*

- Led a team of 5 interns in the development of a multi-tenant SaaS administration, point of sale, inventory and repair ticket management platform.
- Gathered the client's requirements, designed the architecture (modular monolith with Clean Architecture) and planned the project in Jira.
- Designed UI/UX prototypes in Figma and developed the frontend using Angular, TypeScript and Tailwind CSS (responsive views and API integration).
- Developed the backend with C#, .NET, Entity Framework Core and PostgreSQL: REST API with JWT authentication with refresh tokens, custom roles with granular permissions and catalog and inventory modules (purchase orders, GRNs, RMAs).
- Conducted code reviews and coordinated the team to maintain code quality and consistency.

Department of Mathematics, University of Sonora Hermosillo, Sonora
Full Stack Developer (Social service) *September 2025 – May 2026*

- Developed SISCOMAT with 2 teammates, a web application that automatically generates certificates for the National Week of Research and Teaching in Mathematics.
- Designed the solution architecture and user interface prototypes in Figma.
- Developed the frontend with React, TypeScript and Tailwind CSS, and the backend with C# .NET and PostgreSQL.
- Implemented CI/CD with GitHub Actions and deployed the production environment using Docker containers on a Linux server.
- Reduced certificate issuance from 8-12 months to instant generation once the participant list is available; the system is still in use.

SKILLS

Languages: C#, Java, TypeScript, Dart, JavaScript, HTML, CSS, SQL
Frontend: React, Angular, Tailwind CSS, Next.js, Flutter, Bootstrap
Backend: .NET, Entity Framework Core, REST API, Spring Boot, PostgreSQL, MySQL, MongoDB
DevOps and tools: Docker, GitHub Actions (CI/CD), Linux, Git, Figma, Jira
Architecture: Clean Architecture, modular monolith, multi-tenancy
Soft skills: Team leadership, code review, project planning
